Hydraulic Breaker 2009 Improvements

- **Auto Stop System** has been applied on all models 2200 and up to eliminate blank firing, which is proven to be the number one cause of through bolt breakage.
- **Silence kit** has been added to all excavator models, which creates a better look, more protection from dirt and debris in lower wear parts, and less noise.
- **Accumulator** is added to the CAL-2200 , for less hydraulic vibration in system.
- **Longer chisel pins** are added to excavator model hammers for longer tool and bushing life.
- **The CAL excavator case** has been internally redesigned for tighter main body fit and less friction on wear pads.
- **The CAL-16000 hydraulic hammer** is the latest addition to the CAL product line-up: Available for order **March 1, 2009.**
